

Texas Experience Chemistry
Instructional Materials Publisher's Response

Savvas is grateful for the effort of the Texas Education Agency to prepare reports that chemistry educators can use to select high quality instructional materials through the Texas Resource Review process. We are extremely proud that ***Texas Experience Chemistry*** received a 100% rating for TEKS Alignment, ELPS Alignment and all scored Quality Review Indicators.

Texas Experience Chemistry delivers an exciting and innovative way to teach high school chemistry. Featuring thought-provoking phenomena that will engage students, the *Texas Experience Science* high school series is a TEKS-aligned curriculum in which student learning is based on *doing science* through authentic, real-world experiences.

An exclusive partnership with Flinn Scientific, the leading high school classroom lab solution provider, embeds four levels of differentiated and engaging lab experiments, as well as engineering design activities, directly into the programs.
