

Texas Resource Review Section VII Publisher Information Form

This form is designed to collect information for LEAs to consider during their review and adoption process. The information in this form relates to Instructional Materials Quality Evaluation (IMQE) rubric section VII and will not be scored. One form will suffice for all grade levels, if the information stays the same.

Email your completed form(s) to imqe@safalpartners.com by 5 p.m. CST on Friday, September 27, 2019.

Publisher Information

Publisher/Vendor			
Company Name	Amplify Education, Inc.		
Product Name	Amplify ELA (v2)	Grade Level(s)	6-8
Publisher Contact	Florence Cordovano		
Contact Email	fcordovano@amplify.com		
Contact Phone	617-504-4127		
Company Website	www.amplify.com		

VII.1 Technology

Part 1: Access and Use

Yes	No	Feature/Requirement/Specification	Notes and Additional Information
	X	1. This product is a 1:1 product (digital device-to-student).	See response to #2.
X		2. This product combines print materials and digital materials.	Amplify ELA includes interactive group activities, print materials, and powerful digital tools to support online and offline teaching and learning. Highly adaptable and user-friendly, the program gives schools and teachers flexibility based on their technology resources and preferences. Teachers can plan for instruction either on their laptops or

			using the printed Teacher’s Guides. When delivering instructions, teachers can project media such as images or video. Students can work out of the digital program or in their Student Writing Journals.
	X	3. This product is digital access only.	See response to #2.
	X	4. Online products can be used offline- students can continue working when internet connection is dropped.	
	X	5. The product automatically syncs when a connection is re-established, and work completed off-line is saved and uploaded.	
X		6. Students are permitted to use the product on more than one device (e.g. computer at school and a laptop at home).	
X		7. Single sign-on is supported.	
X		8. The product uses the Texas Student Data System (TSDS) with unique IDs for students and staff.	Accounts are created automatically based on automated synchronization of roster data provided by districts. If district-provided data includes TSDS unique IDs, they will be synchronized to the product. For general guidance on roster integration, see our guide here: https://my.amplify.com/help/en/articles/2940982-core-curriculum-enrollment-getting-started-guide
X		9. Other accounts can be created for support staff.	
X		10. Content exportable (If yes, list file formats that can be exported).	Lesson guides are available in PDF format.
X		11. Content is printable.	
	X	12. Content is presented in e-book format (If yes, specify format).	E-Books in a DRM-protected epub format are included as part of the digital library. Lesson content is available in print and in our digital platform.
X		13. The product has embedded videos (If yes, specify format, average file size, and number of videos)	The product contains approximately 170 embedded videos in mp4 format, at variable file sizes and bitrates to support local network conditions.

X		14. The product contains animations.	
	X	15. The product contains simulations (If yes, specify format).	
X		16. The product contains embedded assessments (If yes, describe assessment format, location, and compatibility with an external LMS).	<p>Amplify ELA has embedded formative assessment questions woven into all lessons: in exit tickets, Solos, writing prompts, and close reading activities. The results of these items feed into Amplify ELA's Embedded Assessment Measure, which provides teachers with reports on student performance across reading, writing, and language domains. Rather than simply reporting on percentages of questions answered correctly, these reports use standardized psychometric measures to aggregate and weight each question depending on level of difficulty. Other formative assessments include daily writing prompts and reading comprehension reports.</p> <p>In addition, Amplify ELA contains summative reading assessments at the end of each unit. These incorporate selected response and constructed response items similar to the kinds students encounter on standardized assessments like the STAAR reading test. Assessments can be administered via the Amplify digital platform or on paper. If assessments are delivered digitally, results are available in reporting.</p> <p>Finally, Amplify ELA offers two optional interim assessments per year. These assessments are available in both print (PDF) and digital format through the third-party provider Illuminate.</p>
	X	17. The product platform allows for digital objects (e.g., text, video, simulations, etc.) to be divided and tagged with keywords and standards.	Thin Common Cartridge export is available upon request.

Part 2: Compatibility

Please complete the table below, marking the box in the second column for each compatible device and noting the oldest and newest associated operating systems for that device.

Device Type	Mark box if device is compatible	Oldest operating system/version supported	Newest operating system/version supported	Notes
PC	X	Windows 7+	Windows 10+	
Windows Tablet	X	Windows 8.1	Windows 10+	
Mac	X	OS X 10.11+	OS X 10.14+	
iPhone	<input type="checkbox"/>			
iPad	X	iPad 5+ (iOS 11+)	iOS 13	
Android phone	<input type="checkbox"/>			
Android tablet	<input type="checkbox"/>			
Chromebook	X	Chrome OS	Chrome OS	
Kindle Fire	<input type="checkbox"/>			
Kindle, other	<input type="checkbox"/>			
Nook	<input type="checkbox"/>			
Other e-reader	<input type="checkbox"/>			
Interactive whiteboard	<input type="checkbox"/>			

Compatibility – Browser and Operating System															Leave 'X' if Applicable		
Browser	Oldest supported browser version	Newest supported browser version	Operating System

Internet Explorer 11																	
Other: _____																	

Part 3: Product Format, Installation Requirements, and Support

Yes	No	Feature/Requirement/Specification	Notes and Additional Information
X		1. Browser-based online: Continuous internet connection required.	
	X	2. Plug-ins are required (If yes, list required plug-ins)	
	X	3. Downloaded to individual device: One-time internet connection required.	
	X	4. Installed on LAN (district or school server): No internet connection required for teachers, students, or other users.	
	X	5. Infrastructure and software licensing are required (If yes, list requirements and specify if set-up support is provided)).	
	X	6. Server configuration is required (If yes, list requirements and specify if set-up support is provided).	Product is delivered as web-based SaaS.
	X	4. Installed on individual computer (from DVD, flash drive, etc.): No internet connection required. (If yes, estimate time per device required for setup, indicate if support is provided, and if local IT staff is needed).	

X		5. The product supports deployment through Mobile Device Management (MDM) systems?	Product is delivered as web-based SaaS, so no installation is required; however, MDM bookmark management may be employed.
X		6. Technical support is provided to districts during initial set-up and deployment. (If yes, specify type of support provided).	<p>During initial set-up and deployment, customers are assigned an Implementation Project Manager as a single point of contact who will coordinate materials fulfillment, software configuration, and schedule the desired Professional Learning sessions for each district. They will also work with appropriate district representatives to enroll teachers and students into our products.</p> <p>We also provide pedagogical and technical support for all of our customers during the initial stages and life of the contract as described below.</p>
X		7. Technical support is provided during duration of contract (If yes, specify type of support provided).	<p>Email is available anytime for technical support/product issues.</p> <p>Our support team includes specialists for troubleshooting technology and former educators for matters related to instruction. They are available by phone at (800) 823-1969, Monday–Friday 7:00AM - 7:00PM ET.</p> <p>Amplify has a chat icon within the curriculum for teachers only. Teachers can access Amplify Chat while in lessons. If we ever have any updates to our product, they will be posted here as well</p>

Part 4: Data Security, Access, and Privacy

Yes	No	Notes and Additional Information	
X		1. Login authentication uses district protocols to establish common usernames and passwords (If yes, indicate if TSDS staff/student unique ID is used or if other please specify).	
X		2. Passwords can be reset without assistance from technical staff.	Amplify ELA supports and recommends Single Sign On, in which passwords are administered by district staff and are not available to Amplify systems or staff.
X		3. Student data automatically updated, e.g. roster changes, contact information, etc. (If yes, specify frequency and if automatically exported from SIS or indicate who is responsible for student data export).	Yes. Frequency of synchronization depends upon the specifics of the district data integration chosen. Data integration options include Clever and CSV upload. https://my.amplify.com/help/en/articles/2940982-core-curriculum-enrollment-getting-started-guide
X		4. Location of student data stored by the product fully disclosed.	Amplify leverages Amazon Web Services (AWS) as its cloud hosting provider. Within AWS, Amplify utilizes Virtual Private Clouds (VPCs), which provide an isolated cloud environment within the AWS infrastructure. External network traffic to a VPC is managed via gateway and firewall rules, which are maintained in source code control to ensure that the configuration remains in compliance with Amplify security policy. In addition, the production VPCs and the development VPCs are isolated from each other and maintained in separate AWS accounts. Amplify currently uses AWS data centers physically located in Virginia and Oregon.
X		5. Student data purged after use by the product and is fully disclosed and verified (If yes, indicate how and when).	A key principle of Amplify's approach to privacy is customer control: The school district controls who has access to that data and with whom it is shared.

			As described in the Amplify Customer Privacy Policy at https://www.amplify.com/customer-privacy , we will retain personal information collected from our School District and SEA customers for the period necessary to fulfill the purposes outlined in the Policy and our agreement with that School District or SEA customer. Specifically, at the direction of our customers, Amplify will return or destroy personal information stored by Amplify in accordance with applicable law and customer requirements.
X		6. Student data be purged by the district at any time.	Yes - Students' parents or guardians may contact the District to review personally identifiable information in the pupils' records and request correction of erroneous information. The District may request the Amplify to make such corrections, if applicable.
X		7. Data encrypted in transit (If yes, indicate which protocols are supported).	Yes. As part of our comprehensive information security program, Amplify ELA ensures the encryption of personally identifiable information (PII) at rest and in transit. Amplify follows OWASP and NIST guidelines in the selection and application of appropriate encryption algorithms and techniques for each data protection use case. Amplify encrypts all student personal information in transit over public connections using Transport Layer Security (TLS), commonly known as SSL, using industry-standard ciphers, algorithms, and key sizes.
X		8. Data elements are encrypted at rest, i.e. in a database or file system (If yes, specify which data elements are encrypted).	Yes. As part of our comprehensive information security program, Amplify ELA ensures the encryption of personally identifiable information (PII) at rest and in transit. Amplify follows OWASP and NIST guidelines in the selection and application of appropriate encryption algorithms and techniques for each data protection use case. Amplify encrypts student personal information at

			rest using the industry-standard AES-256 encryption algorithm.
X		9. Personally-identifying student data is recorded by the product (If yes, list required and optional data fields).	<p>Required data elements include:</p> <p>Student roster data:</p> <ul style="list-style-type: none"> • Name • Email address • School enrollment • Class enrollment <p>Optional data elements include:</p> <p>Student identifiers</p> <ul style="list-style-type: none"> • District or state ID <p>Student demographics</p> <ul style="list-style-type: none"> • Gender • Ethnicity or race • Language information • Low income status
X		10. The student data privacy pledge has been agreed upon (Please provide link to verifying document and/or your student privacy policy).	Yes, Amplify is a signatory to the Student Privacy Pledge. Amplify’s customer privacy policy is available at https://www.amplify.com/customer-privacy/
X		11. The product conforms with FERPA regulations.	Yes. At Amplify, all of our products are built to facilitate LEA compliance with applicable data privacy laws. FERPA and other regulations related to the use of student PII restrict how LEAs may share this information. Amplify facilitates compliance with such regulations by ensuring that LEAs control who can access their data. Within Amplify applications, the LEA must authorize all sharing of student PII with a third party. Amplify’s Customer Privacy Policy (http://amplify.com/customer-privacy) governs the collection and use of student PII via our products, and contains additional details about those practices.

	<p>X</p>	<p>12. A third-party has evaluated the product for FERPA compliance (If yes, provide a link to the report).</p>	<p>As part of its comprehensive privacy and security programs, Amplify engages third parties on at least an annual basis to evaluate its programs. In addition to these risk assessments, penetration testing and other proactive security testing and monitoring outlined above, Amplify has successfully completed a SOC 2 Type 2 examination of controls relevant to security. The examination is formally known as a Type 2 Independent Service Auditor’s Report on Controls Relevant to Security. It was conducted by Schellman & Company, LLC and covers the period from April 1, 2018 to March 31, 2019. The report states that Amplify’s systems meet the criteria for the security principle and opine on management’s description of the organization’s system and the suitability of the design of controls to protect against unauthorized access, use, or modification.</p>
<p>X</p>		<p>13. The product employs rule-based security (if yes, provide a link to detailed information and supporting documents).</p>	<p>Amplify’s comprehensive security program incorporates role-based and contextual authorization and access controls.</p> <p>Permissions within Amplify applications are designed on the principle that school districts control access to all student data. To facilitate this, Amplify applications are designed so that roles and permissions flow from the district to the individual user. For example, applications that offer schools a way to collect and report on assessment results have a web interface that requires district</p>

		<p>administrators to authorize individuals to view student personal information.</p> <p>Security controls within applications are used to ensure that the desired privacy protections are technically enforced within the system. For example, if a principal is supposed to see only the data related to his or her school, Amplify ensures that, throughout the design and development process, our products restrict principals from seeing records for any students outside his or her school.</p> <p>To make sure Amplify applications properly enforce permissions and roles, our development teams conduct reviews early in the design process to ensure roles and permissions are an essential component of the design of new applications.</p> <p>All teachers, coaches, principals, and district staff access student data via an online website. Permissions are flexible – e.g. whether a teacher can see another teacher’s data, or is restricted to access to her class’s data only. Permissions can be established by the district. Because the data is uploaded immediately upon synchronization, it is readily available for all stakeholders in the child’s learning.</p> <p>By default, teachers have access only to the students in their classes and principals have access only to classes in their school. For coaches, permissions can be assigned for specific classes across schools. Students only have access to their own assessment and instructional material.</p>
--	--	---

			Additional information is available at https://www.amplify.com/security
X		14. The product allows registration or data collection from children under the age of 13 (If yes, provide a link to the COPPA Safe Harbor certificate).	Amplify complies with the Children’s Online Privacy Protection Act (“COPPA”) and the FTC guidance on COPPA and Schools (Section M, FTC FAQ) governing collection, use or disclosure of personal information from students in an educational institution. Amplify as the operator agrees that the company’s use of PII in the personal information and any other school data will be solely for the benefit of the students and for the school system, and that Amplify will not collect personal information from students for any purpose other than such authorized purposes, including any other commercial purpose.
X		15. The product allows a download of LEA-generated data (including usage data) without manual intervention by product staff.	Teachers can one-click export student scores from each lesson in CSV format. Upon request, Amplify can provide larger-scale exports of student performance data on a periodic basis.
	X	16. Product adheres to Ed-Fi data standards (If no, list data standards to which the product adheres).	Amplify ELA is delivered as a web-based Software as a Service (SaaS), built on the global network and application interoperability standards of HTML5, CSS, ECMAScript (JavaScript), HTTP/S, and TLS. The solution supports the SAML standard for authentication. In addition, it supports key educational technology standards for interoperability, including IMS Global Learning Tools Interoperability (LTI), IMS Global Thin Common Cartridge (Thin CC), IMS Global OneRoster, and the Advanced Distributed Learning Initiative Experience API (xAPI).
